

# Non-Gaussian halo statistics from excursion sets

**Do you remember  
the Press-Schechter  
mass function?**

**WHAT? Are people  
still working  
on THAT?**

Yes we do. It's simple, it's elegant and now... IT WORKS!!

(or it soon will... solved the problem of first crossing  
of random walks with correlated steps)

**Marcello Musso**

In collaboration with A. Paranjape and R. Sheth

MPA, Munich, November 2012
